

Ford XR6 Series

Springy Performance XR6 Packages

Stage 1

Package Includes

Ford Flash
180° Thermostat
Custom Dyno Tune
Before and After Dyno Graphs

With this upgrade it would be reasonable to expect between 230 to 250 rear wheel kilowatts.

It is known these cars suffer from power loss due to higher engine running temps. Keeping the engine cool equals more constant higher power levels

Some cars - and this usually depends on kilometres - may suffer from premature valve spring deficiency

Total Price Including all parts and labour - \$ 1,323.00

Valve Spring Upgrade Including parts and labour - \$ 850.00

Stage 2

Package Includes

Ford Flash
180° Thermostat
High Flow Typhoon mod
K & H High Flow Air Filter Element
Custom Dyno Tune
Before and After Dyno Graphs

BA's & BF's With this upgrade it would be reasonable to expect around 250 - 270 rear wheel kilowatts.
